

BrightView

A BETTER APPROACH TO ADDICTION TREATMENT.

Treatment for Substance Use Disorder where the numbers speak for themselves.

BrightView measures success by looking at specific outcomes data over extended time periods, which is why we are a leader in helping those with addiction heal.

70%

BrightView patients decrease illicit substance use by an average of nearly 70% within the first 90 days, with many patients achieving complete abstinence.

Over the first 90 days in our program, time spent in jail decreases by nearly 70% for BrightView patients.

50%

After just 90 days with BrightView patients report more than a **50% decrease in alcohol consumption on average**, with many patients achieving complete abstinence.

Patients report a 1/3 decrease in emergency room visits after just 3 months in BrightView's program and a **50% decrease after one year**.

Within six months, unemployment among BrightView patients **decreases by over 50%**.

In the first 90 days, BrightView patients experience a **decrease in arrests of nearly 60%**.

60%

BrightView patients report a nearly 50% increase in engagement with regular medical providers (ex. primary care) after just 90 days in treatment.
